

Haroun Oujih

Lead Full Stack Engineer | AI/LLM Integration | SaaS & ERP Architecture

Open to Remote, Hybrid & On Site | 10+ years of experience

haroun.oujhi@hotmail.com | +216 54 443 740 | github.com/HarounOujhi | linkedin.com/in/haroun-oujhi

Profile

Full-stack engineer with 10+ years building SaaS and ERP platforms, now focused on applied AI/LLM integration — invoice OCR, structured data extraction, and workflow automation in production.

Architected a multi-tenant ERP ecosystem (Next.js, Prisma, PostgreSQL) that includes an LLM-powered document pipeline with cost-optimized, multi-model routing and per-tenant feature-flagged rollout.

Proven track record of owning full-lifecycle products — architecture, backend, frontend, and delivery — across multiple concurrent SaaS products.

TECHNICAL SKILLS

Frontend: React, Next.js, Remix, React Native, Angular, Ionic, Ant Design, Tailwind, PWA

Backend: Rust, Node.js, NestJS, Laravel, PHP, Python, JavaScript, TypeScript, REST APIs, GraphQL, Prisma

Databases: PostgreSQL, MongoDB, MySQL, DynamoDB, Snowflake, Elasticsearch

Cloud & Tools: AWS (Lambda, Step Functions), Docker, Git, CI/CD, Agile/Scrum

AI & Business Automation: LLM Integration, OCR & Structured Data Extraction, Prompt Engineering, Multi-Model Routing & Cost Optimization, Feature-Flagged AI Rollout, AI-Assisted Workflow Automation

Architecture & Leadership: Multi-Tenant SaaS Architecture, Modular ERP Design, System Architecture, REST & GraphQL API Design, Technical Leadership, Product Development, Team Leadership, Project Management

EMPLOYMENT HISTORY

Lead Full Stack Developer — MAHD *Aug 2023 – Present*

- Lead technology strategy and own the full product development lifecycle — architecture, backend, frontend, and delivery — across a multi-product SaaS portfolio.
- Architected a multi-tenant ERP SaaS platform (Next.js, Prisma, PostgreSQL) covering inventory, purchasing, sales, finance, and CRM.
- Built an LLM-powered invoice-to-purchase-order pipeline (OCR + structured extraction) with cost-optimized multi-model routing and per-tenant feature flags for controlled rollout.
- Shipped a natural-language business query assistant, letting non-technical staff query inventory, sales, and finance data directly.
- Own system architecture and data modeling across three interconnected Next.js applications sharing a unified multi-tenant schema, plus a plugin/connector framework syncing product catalogs from WooCommerce, PrestaShop, Magento, and Shopify via a generic ingestion API.

Key Projects

Sunchine.me (Iraqi Customs Platform)

- Engineered a large-scale customs management platform used by Iraqi Customs to streamline import/export operations and high-volume document processing.

Tech: Laravel, React, TypeScript, Ant Design

SoldX SaaS Ecosystem

- Designed and developed a complete ecosystem of commerce and business management products for Tunisian SMEs.
- snap.soldx.tn: e-commerce storefront and template builder for rapid, auto-provisioned online shop creation and customization.

- [soldx.tn](#): multi-tenant ERP platform enabling independent business management
- [studio.soldx.tn](#): mobile-first modular ERP covering inventory, purchasing, sales, finance, CRM, projects, and business operations.

Core Technologies: Rust, Node.js, NestJS, Laravel, GraphQL, PostgreSQL, MongoDB, Prisma, React, TypeScript

John Dewey School Management System [johndewey-school.org](#)

- Architected and developed a role-based school management platform for administrators, teachers, students, and parents.
- Implemented advanced modules including Attendance, Timetables, Exams, Canteen, HR, Payments, and Student Management.

Lead & Full Stack Developer — DNext *March 2022 – July 2023*

- Developed new platform modules and enhanced existing enterprise features.
- Built complex frontend interfaces using React, Draft.js, and Ant Design.
- Implemented AWS Lambda services for large-scale data processing across Snowflake, MySQL, and DynamoDB.
- Integrated Elasticsearch for high-performance search and indexing.

Core Tech: Node.js, React.js, AWS Lambda, Snowflake, DynamoDB, Elasticsearch

Lead & Full Stack Developer — Genext-IT, Paris *May 2019 – Mar 2022*

- Led development of multiple web and mobile applications across construction, transportation, education, and event management.
- Designed software architecture, database models, deployment strategies, and technical solutions.
- Delivered scalable applications while collaborating directly with stakeholders and project teams.
- Delivered the SMS Sending Manager and TryAndBuy platforms from architecture through implementation.

Core Tech: Node.js, Angular, React, React Native, Angular, MongoDB, MySQL, PostgreSQL, Odoo, Python

Full Stack Developer — PagesQatar, Qatar *Oct 2017 – May 2019*

- Developed business management applications including Nutree (inventory and product management) and an enterprise SMS management platform.
- Built mobile applications using Ionic and React Native.
- Integrated business solutions with WordPress-based platforms and third-party services.

Core Tech: Node.js, Angular, React Native, Ionic, WordPress, MySQL

Full Stack Developer — Tunisie-Technologie *Oct 2015 – Oct 2017*

- Printaura: built an e-commerce management system integrating with Etsy, Shopify, eBay, Ecwid, PrestaShop, Magento, and others.

Core Tech: PHP, MySQL, jQuery, HTML, CSS, Bootstrap

Full Stack Developer — NCS Tunisia *Jan 2014 – Oct 2015*

- Developed Link-voyages, a travel agency management website.
- Built Waiter, a mobile application for restaurant order management with offline synchronization.
- Developed inventory management, POS (Tasswia), and sales/purchasing systems.
- Created static and dynamic websites.

Core Tech: PHP, MySQL, jQuery, Java, [VB.NET](#)

EDUCATION

- License Degree in Computer Science — ISSAT Sousse (Dec 2010 – Dec 2013)
- Computer Science Baccalaureate (Dec 2006 – Dec 2010)
